Buried lights

Buried lights are a creative and effective way to enlighten and glamorize natural and architectural sceneries at night. Also known as ground lights, or walkover lights, led buried lights are the most refined way to highlight the most beautiful façades and gardens, while marking paths, pavements and tracks in order to minimize the risk of accidents in the dark. LED Buried Light incorporate high efficiency lenses and reflectors in a variety of beam angles and beam profiles. These lights can be specified in different combinations and configurations to provide both wall grazing and projector distributions from the same luminaire. LED Buried Light suitable for paths, parks, squares, gardens, villas and etc. The body of LED Buried Light is made from high quality stainless steel. Diffuser is using clear intensive glass. The gasket is manufactured by Themostable silica gel to improve protection class. Fastener is made from stainless steel with high intensity and corrosion protection.
